

**TECHNICAL DATA:**

Horizontal end milling machine with automatic feeding, milling at 45°/90°/-45° and intermediate degree with quick change of the cutter block. Spindle at 7000rpm managed by inverter and potentiometer with frequency read out on display with led useful stroke 390mm. Max cutter diameter 200mm. Motor three phase 2.5HP. Working pressure 7 Bar. Overall dimensions: 104x72x110 cm. Weight: 150 kg.

**STANDARD EQUIPMENT:**

Pneumatic clamping set  
Turret stop for presetting 6 milling depths  
Pneumatic lubrication  
Cutter block 32mm  
Air gun  
Air filter  
Full protection guard  
Service spanners

**OPTIONALS:**

Single phase motor  
Cutter block 32mm  
Emulsified cutting oil 20 lt
